8 Critical Decision Points when Deploying AI
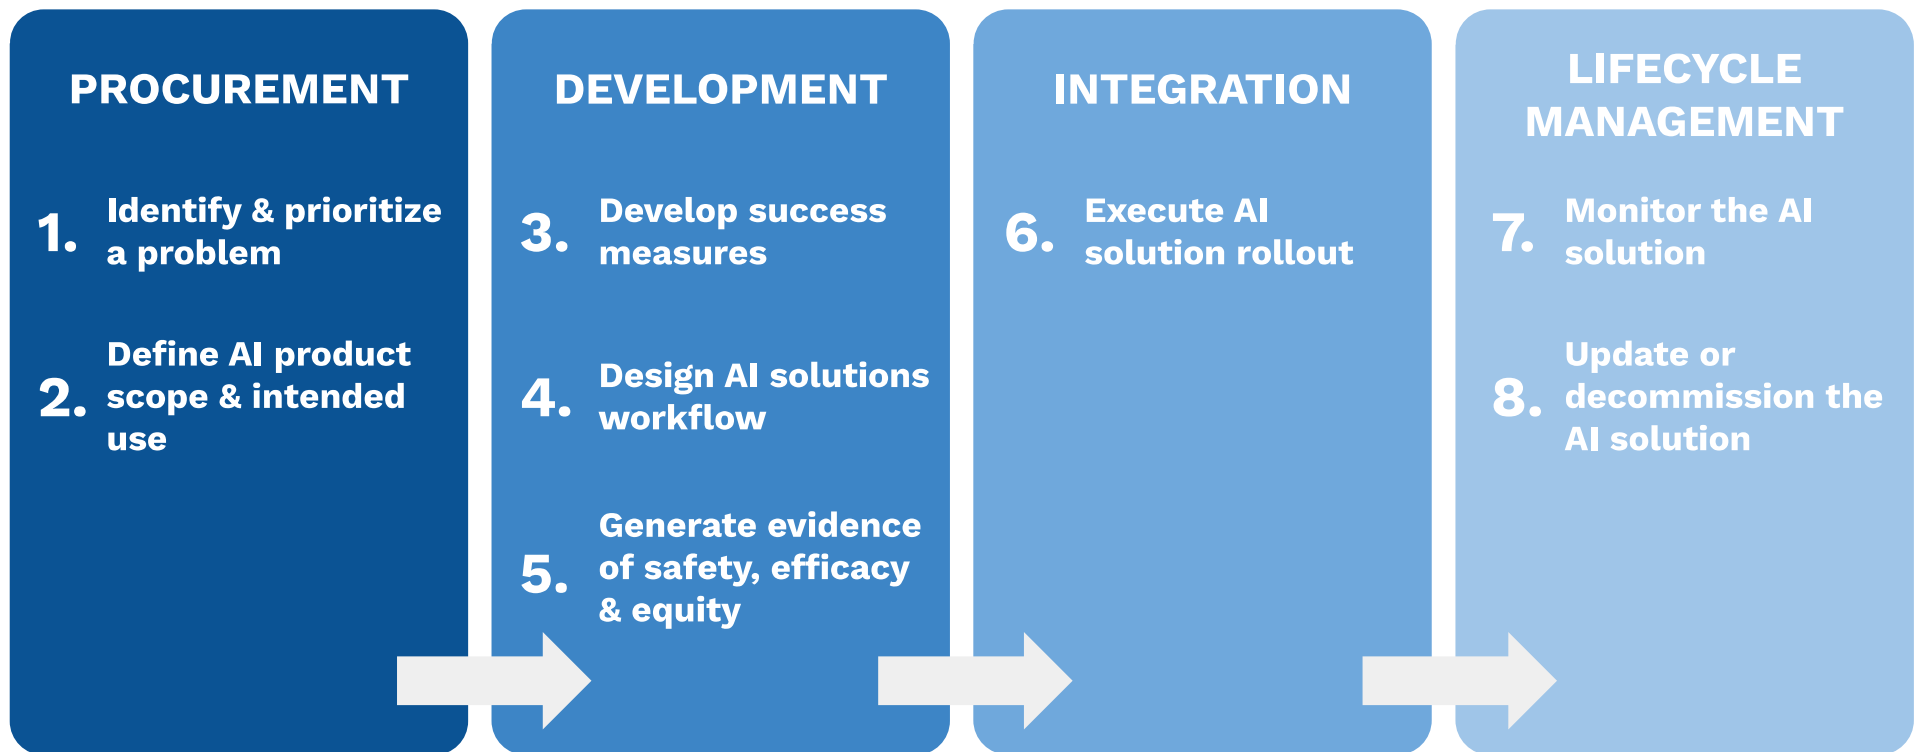

Health systems must outline and define a process for use case deployment, from cradle to grave

PROCUREMENT

1. Identify & prioritize a problem

2. Define AI product scope & intended use

DEVELOPMENT

3. Develop success measures

4. Design AI solutions workflow

5. Generate evidence of safety, efficacy & equity

INTEGRATION

6. Execute AI solution rollout

LIFECYCLE MANAGEMENT

7. Monitor the AI solution

8. Update or decommission the AI solution
