

The leading
learning solution
exclusively for
pediatric professionals

Children's Hospital Association

Accreditation & Regulatory

Like any organization, children's hospitals are required to meet set expectations to ensure high-level performance. The Accreditation & Regulatory product line consists of courses that help organizations educate staff, helping them meet standards for the Joint Commission and focus on delivering quality care in a safe environment. In addition, you can add organization-specific information and policies to online topics, creating a personalized solution.
